

## WHAT WE COMPOUND:

### Pain Management

Everyone experiences some sort of pain in their lives. It can take the form of a stress-induced headache, a muscle strained from sports, or the result of an injury. For some, pain can be chronic & is something they live with on a daily basis.

Compounded treatments are tailored specifically for your pain management needs. Some dosage forms may bypass the gastrointestinal tract, providing optimal results with less gut irritation: topical gels, creams or sprays that can be applied directly to the site of the pain & absorbed through the skin, or custom-flavored troche that dissolves under the tongue, nasal spray, or a suppository.

On many occasions, multiple medications can be combined into a single dose of a specially prepared compound, providing greater convenience for the patient.

### Dental

Making the dentist's chair more comfortable with customized medications for:

Procedural Anxiety	Pain Relief
Dry Socket Treatments	Gum Disease
Fluoride Treatments	Oral Ulcers
Plaque Removal	Canker Sores
Tooth Whitening	

Other creative solutions for medication problems may include liquids, pastes, lip balms, lollipops, or topical anesthetics.

### Cosmeceuticals

There are many desirable aspects of growing older. Longevity brings experience, wisdom & maturity. You may be getting older, but your skin doesn't have to show it. Cosmeceuticals is a custom antidote for aging skin.

The loss of elasticity, the age spots, the crows' feet, laugh lines, & other wrinkles that are inevitable as the skin begins to age.

While we can't turn back the clock, custom – compounded cosmeceuticals can help your skin to look & feel like it did five, ten, or even fifteen years ago – moist, smooth, protected, & with reduced appearance of wrinkles.

### Hormone Replacement Therapy

Anyone who has been through puberty knows that hormones have a powerful effect your body. Hormones affect many areas of health, including mood, metabolism, sexual & reproductive function. If your hormones become unbalanced, you may end up feeling like a stranger in your own skin with:

Pre-menstrual Syndrome	Weight Gain
Irregular Menstrual Cycle	Night Sweats
Vaginal Dryness	Hot Flashes
Post-Partum Depression	Endometriosis
Fibrocystic Breasts	Low Libido
Sleep Disturbances	Moodiness
Painful Intercourse	Infertility

No two women are alike. Working closely with your healthcare provider, our compounding pharmacists can help you get your hormones back into balance.

## WHAT WE COMPOUND CONT'D:

### Men's Health

Termed *andropause* or *male menopause*, these symptoms are related to decreasing levels of testosterone or increasing levels of estrogen. Of course, not all men are the same – different men need different amounts of testosterone to help address their individual symptoms.

Compounding medications can help with:

Erectile Dysfunction	Low Libido
Decreased Muscle Mass	Anxiety
Loss of Interest	Hair Loss
Prostate Health	Aging Skin
Aches & Pains	Osteoporosis
Athlete's Foot	Impotence
Excessive Sweating	Heart Disease
Chronic Bad Breath	Depression

### Pediatric

There's nothing fun about being sick, and taking medicine just seems to make it worse. But pediatric compounding is more effective than a spoonful of sugar.

Medications for pain relief, respiratory disorders, diabetes, head lice, diaper rash & cold sores can be enticingly flavored or transformed into colorful dosage forms.

Working with a Compounding Pharmacist, ingredients like casein, soy, sugars, gluten, dyes, carbohydrates & heavy metals that can trigger reactions, such as depression, hyperactivity & gastrointestinal problems, can be managed.

### Sports Medicine

Whether you're a workout enthusiast who needs to soothe aches and strains, a high school player recovering from a sports injury, or a weekend warrior trying to ease pain during the work week, compounding can provide serious benefits for every kind of athlete.

Various drugs may be able to be compounded into a single dosage form to combat nerve pain, topical antifungal medications, or formulate special preparations to heal blisters or calluses.

Compounded sun block creams, lotions, and lip balms may help protect athletes participating in outdoor sports.
